

To All Who Responded,

The following charts represent the preliminary results of our Long Run Creek Survey. There were more than eighty responses.

By "preliminary", we mean to say that this is the "raw data" and that it has not yet been analyzed. One area of concern was the request to have everyone "prioritize" their concerns by numbering them one (1) through ten (10) without establishing whether number one or ten would represent the most important issue. We also plan on grouping results by geographic areas as well to see if some issues are more prevalent in certain areas.

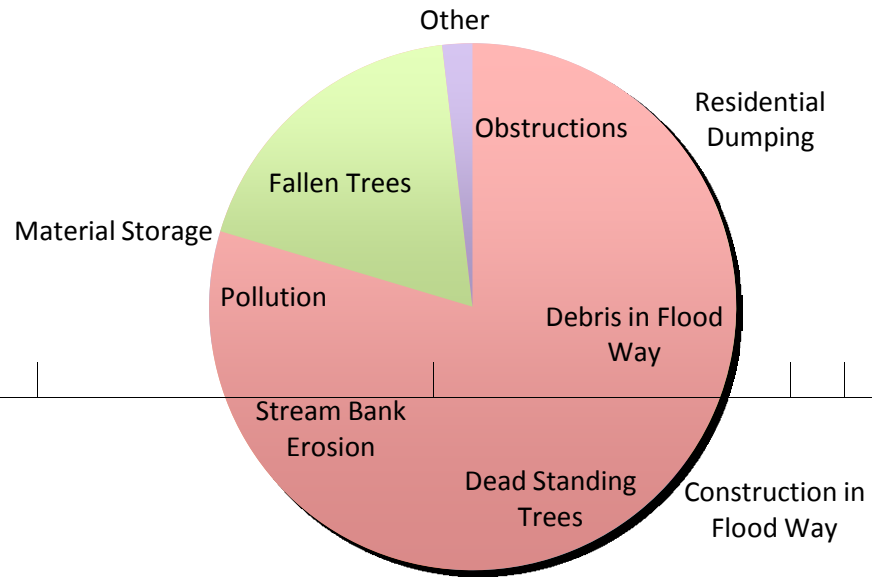

We will continue to update this web page as we progress.

We now have a new e-mail address for this project. It is:

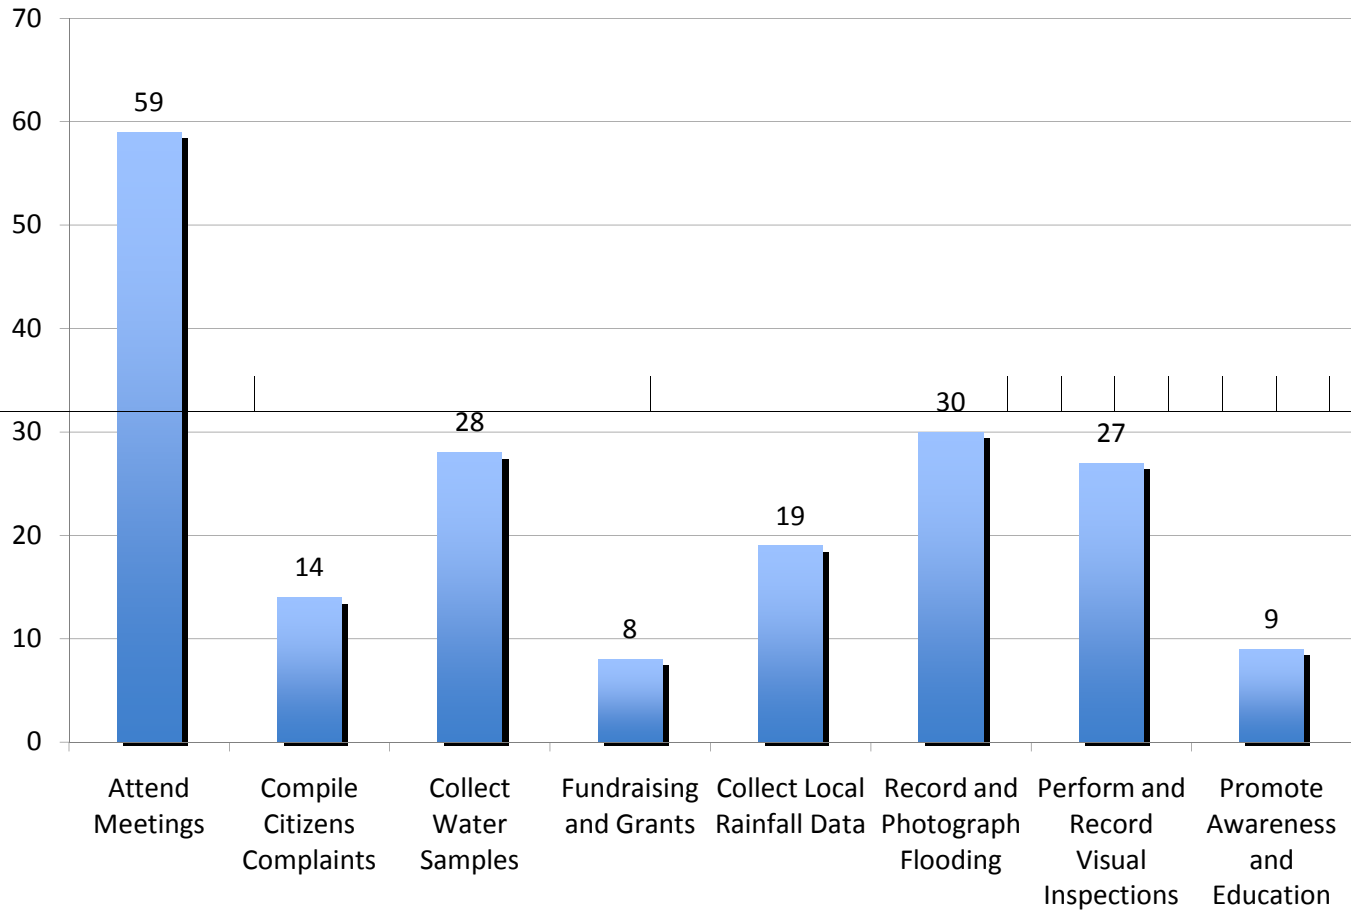

Longruncreek2010@aol.com

Thank you and Happy Hollidays.
